Prospective Clients of;
Construction Concepts

Dear Prospective Clients,

We recently contracted with Construction Concepts to build a state of the art live fire training facility. We were pleasantly pleased with the timeliness and accuracy of the project. However, the big plus we experienced when working with this organization was the ambient level of integrity which we consistently encountered throughout the project. Suffice to say, Construction Concepts differs in this aspect from a number of contractors that would seem to proliferate within the industry.

We were pleased with the firms cost containment commitment and the commitment to scheduling sensitivity. Construction Concepts provided strong onsite supervision and coordination throughout the project. We were informed of relevant developments and not bothered with miniscule friction points that could be handled by the site supervisor.

We would most assuredly consider using this firm on subsequent projects, and I would be willing to speak with potential clients' reference my personal experience with this project and this firm.

Cordially,

Jon Surbeck,
City of Evans Fire Chief
